

## Company Quality Policy

Flycom Technologies is creating a common platform for quality standards in remote sensing, surveillance and diagnostics services and the development, maintenance and support of its own software solutions and consultancy services.

The Quality Policy is an integral part of our practical, everyday work and a constant challenge to quality management. Everyone - management and employees alike - is committed to our success.

Underpinning this commitment are 6 core values:

- Excellence
- Innovation
- Teamwork
- Flexibility
- Safety
  - ❖ Safe performance of work from an occupational health and safety perspective
  - ❖ Information security
- Sustainable operations

### Commitment

To meet this commitment, our policy means that we manage our business to consistently exceed customer expectations for quality of service and products. We are committed to monitoring and complying with all legislative and other voluntary requirements in the Company's area of operation, as well as addressing the Company's risks and opportunities to help further enhance the quality of our services and products.

We are committed to providing the necessary information and resources to implement performance targets, development activities and plans for improvement in the areas of air maintenance services, data processing and data management.

In support of this commitment, continuous improvement of operations and service quality through independent assessment, and the implementation and maintenance of management systems that meet all aspects of the requirements of the internationally recognised quality standard ISO 9001:2015, must be implemented and maintained for all defined areas of the business by a recognised certification body, SiQ.

In support of this commitment, we will undertake continuous improvement of performance and service quality through independent assessment, and the implementation and maintenance of management systems that meet all aspects of the requirements of the internationally recognised quality standard ISO 9001:2015. recognised by the SiQ certification body, must be maintained for all defined areas of the business.

### **Objective**

Our objective is to maintain and strengthen our role as a key global player in remote sensing and to become a leading regional player in the GIS segment, and to operate in a sustainable and responsible manner towards our employees, external partners, and the environment in order to achieve our goals.

Flycom Technologies unconditionally commits to strive for continuous leadership and employee integrity in the pursuit of our business goals and operations by identifying key preventive mechanisms and business practices as outlined in the Flycom Integrity Communities and Guidelines for Maintaining the Integrity of Our Company.

As part of our policy and commitment to continuous improvement, we will review this policy statement annually.

Filip Rojs

Chief Executive Officer, Flycom Technologies
